

WorkPlace Solutions has developed proprietary technology to assist employers with enrollments. As a leave behind system, human resource staff now has access to benefit elections at their fingertips. The wpsENROLL system integrates with an employer's systems. It can be the system into which all employee data entry is made. This includes basic new hire information, benefit enrollment information, changes in employee data, employment status. Once entered, this data is automatically sent to all other internal and/or external systems that require it.

wpsENROLL

The wpsENROLL system is designed to provide:

-  online or laptop benefit communications
-  self-service or HR-assisted enrollment
-  comprehensive reporting
-  simplified data exchange
-  benefits administration

Key features of wpsENROLL include:

✓ Online or Laptop Deployment	✓ Co-browsing
